SOFTWARE DEVELOPMENT INTERNSHIP

Software Development & AI Integration

A 6-Week Professional Internship Presentation Report

INTERNSHIP DURATION

June 18 – July 31, 2026 (6 Weeks) • Remote

STUDENT CREDENTIALS

Nayandeep Prakash

Enrollment / Roll No.

2410030370

Program & Semester

B.Tech (CSE)

HOST ORGANIZATION

itsfolio.tech

From resume to portfolio — instantly

Candidate & Program Overview

Candidate Details

Student Name: NAYANDEEP PRAKASH

Roll Number: 2410030370

Degree: B.Tech (Computer Science & Engineering)

Academic Batch: 2026-2027

University: IILM University, Greater Noida, U.P.

Internship Profile

Position: Software Development Intern

Organization: itsfolio.tech

Duration: 6 Weeks (June 18 – July 31, 2026)

Work Mode: Remote

Compensation: Certificate of Internship & LOR on completion

Organization Profile: itsfolio.tech

itsfolio.tech is an AI-powered platform that turns resumes into hosted, recruiter-ready portfolio websites in seconds, built around the vision *"From resume to portfolio — instantly"*.

- Founder-Led Product:** Founded by Mr. Ashish Umrao; interns collaborate directly with the founder on product, backend, and AI-integration tasks.
- AI at the Core:** Automatically parses an uploaded resume and generates a polished, hosted personal portfolio website within seconds.
- Startup Environment:** A fast-shipping, early-stage startup offering exposure to the full lifecycle — from code to ship to user feedback.

Growth in first two months since launch

3,000+

Visitors

500+

Monthly Active Users

800+

Portfolios Generated

Problem Statement & Industry Context

The Industry Challenge

Students and early-career professionals struggle to present their skills effectively to recruiters. Almost everyone has a resume, but very few have a personal portfolio website — building one traditionally demands design skill, web development knowledge, hosting setup, and significant time.

A strong resume sitting as a static PDF provides far less recruiter impact than a live, polished, shareable portfolio website.

The Internship Scope

Contribute to the live itsfolio.tech platform as a software developer: hands-on development on the Next.js/React codebase, shipping real features to real users, and strengthening the backend and AI pipeline.

Collaborating directly with the founder on product, backend, and AI-integration tasks in a fast-moving startup environment.

Core Internship Objectives

Frontend Development

Ship real, user-facing features on the live Next.js/React platform — components, portfolio templates, and responsive UI improvements.

Backend & APIs

Build and improve Next.js API routes and server-side logic powering the resume upload and portfolio generation pipeline.

AI Integration

Work on LLM-powered resume parsing and portfolio content generation — prompt design, structured outputs, and quality improvements.

Startup Lifecycle

Experience the full lifecycle of a growing startup — from code to ship to user feedback — with founder-level collaboration.

Technologies & Development Toolchain

1

Frontend

Framework: Next.js, React

Languages: JavaScript / TypeScript, HTML, CSS

UI: Responsive, utility-first styling

2

Backend

Runtime: Node.js

APIs: Next.js API routes, RESTful services

Data: Cloud database & file storage

3

AI & GenAI

Core: LLM APIs for resume parsing & content generation

Practice: Prompt engineering, structured outputs

4

DevOps & Workflow

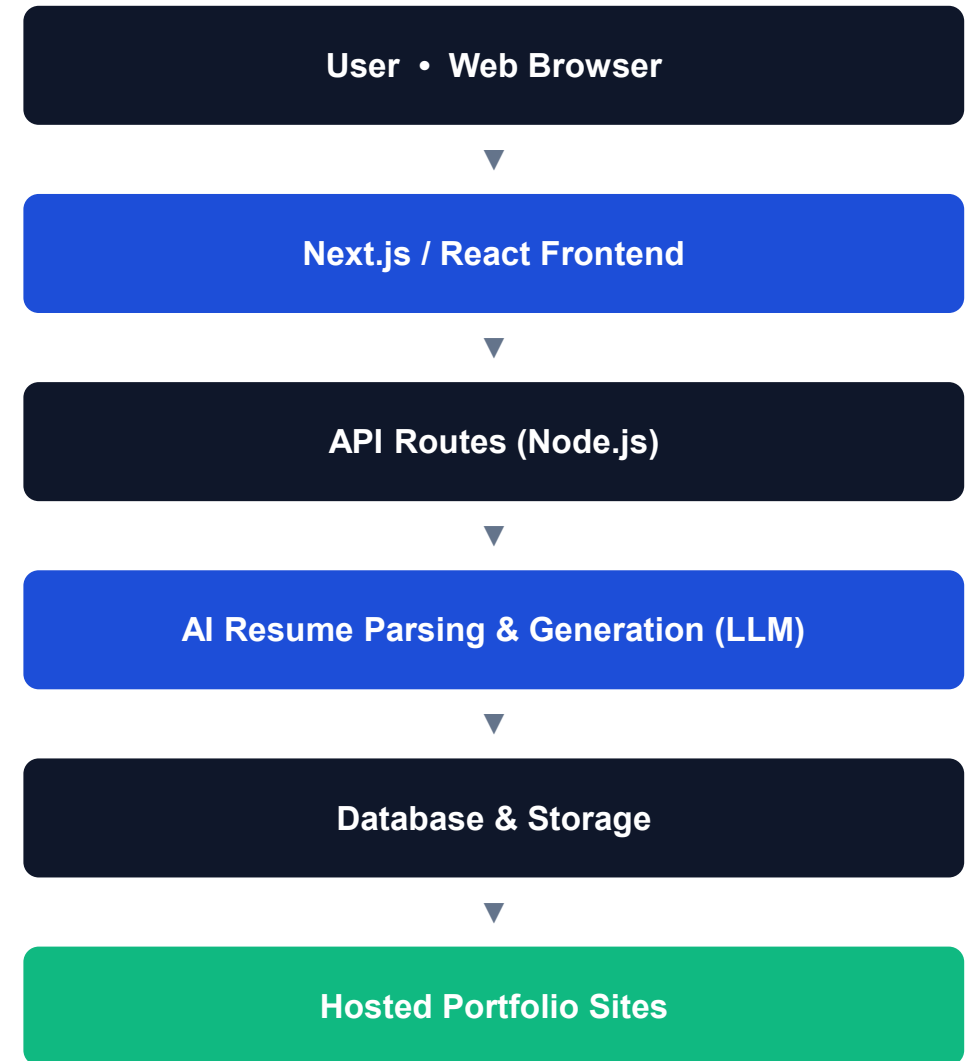

Versioning: Git, GitHub, code reviews

Deployment: Cloud hosting for the live app

Process: Async updates, agile shipping

Platform Architecture

- **Presentation Layer:** Next.js/React web app where users upload resumes and manage their hosted portfolio.
- **API Layer:** Next.js API routes and server-side logic handling uploads and generation requests.
- **AI Processing Layer:** LLM services that parse resumes and generate polished portfolio content.
- **Data Layer:** Databases and storage for accounts, resume data, and portfolio configurations.
- **Hosting & Delivery:** Cloud infrastructure serving each portfolio as a fast, public, recruiter-ready site.
- **Feedback Layer:** Analytics on visitors and generation that drive product iteration.

Internship Timeline (Weeks 1 to 3)

Week 2

Frontend Features

React components, portfolio templates, responsive UI polish shipped to the live platform.

Week 1

Onboarding & Codebase

Product roadmap, dev environment setup, Next.js/React codebase walkthrough, Git workflow.

Week 3

Backend & APIs

API routes, resume upload & processing pipeline, data modelling and integration.

Internship Timeline (Weeks 4 to 6)

Week 5

Testing & Deployment

Bug fixes, feature testing, deployment workflow, performance & SEO optimization.

Week 4

AI Integration

LLM-based resume parsing & content generation, prompt design, structured outputs.

Week 6

Feedback & Delivery

User feedback iteration, analytics, documentation, and final handover with async updates.

Key Work & Demonstrated Skills

- ✓ **Live Feature Development:** Shipped hands-on development work on the live Next.js/React platform — real features delivered to real users.
- ✓ **Backend & Pipeline Engineering:** Built and improved API routes and server-side logic powering the resume-to-portfolio generation flow.
- ✓ **AI-Powered Generation:** Worked on LLM-based resume parsing and portfolio content generation, improving quality and reliability.
- ✓ **Founder-Level Collaboration:** Collaborated directly with the founder on product, backend, and AI-integration tasks.
- ✓ **Ownership & Communication:** Maintained 15–20 hours/week commitment with proactive, asynchronous progress updates and end-to-end ownership.
